

PREMIER PLUMBING MAINTENANCE PLANS

Your defense
against the
unexpected.

Did you know in an average home 20 gallons of water is wasted daily due to leaky faucets? Valiant Energy Solutions offers plumbing maintenance for your home.

Premier Plan

\$159 annually

24/7

emergency service
with no after-hours
surcharge

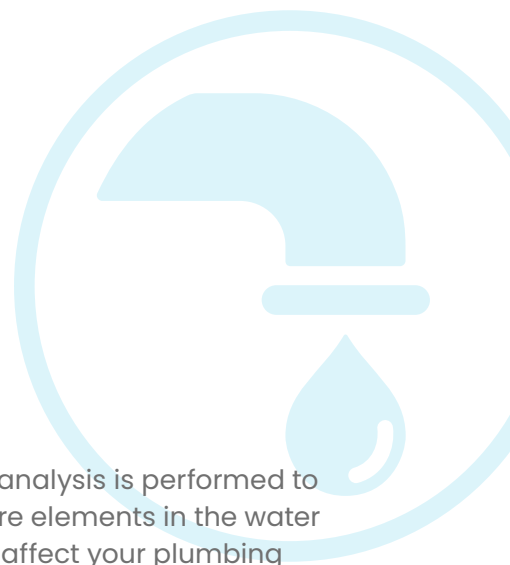

**PRIORITY
SCHEDULING**

for all
service calls

**Detailed plan
benefits on back.**

In addition to expedited service and consistent savings, all elite members will receive a complimentary annual plumbing tune up. This maintenance appointment will not only identify acute issues before they arrive, but also enhance your energy efficiency.

Our inspection includes:

- Draining of the hot water heater to extend the life of the water source.
- Analysis of the quality and performance of your water heater anode rod, which helps prevent corrosion and protects the equipment. An annual check of your anode rod may also maintain compliance with the manufacturer's warranty.
- A free analysis of your water via independent testing to determine what elements may be present in your water that can be detrimental to your plumbing system.
- Well water systems analysis is performed to determine if there are elements in the water that can negatively affect your plumbing system. If you have an in-line filter, we'll change the cartridge. If you don't and you need one, we'll recommend one and give 20% off installation.
- Inspection of all faucets and fixtures for leaks, as well as washing machine hoses, ice maker lines and humidifier feed lines.
- Inspections of critical systems to ensure they are cycling and/or draining properly: sump pumps, well pump/well tank and sewer/septic pumps.
